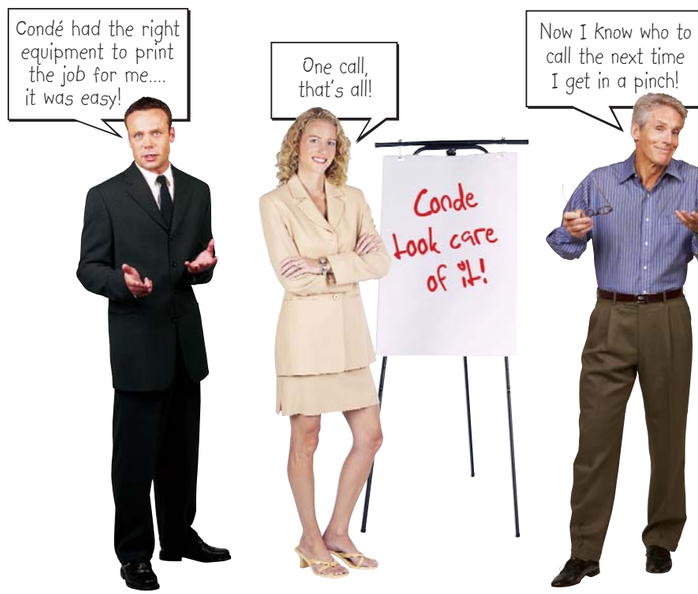
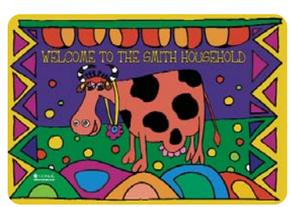
Condé Systems is now offering a wholesale sublimation and heat-transfer fulfillment service to current customers and distributors. If you've got a job that is a little too big to handle, have temporary equipment problems, or need to produce products that are too large for your current transfer equipment (floor mats, bath towels, baby blankets, etc.), Condé can help. Our experience and expert knowledge in this market make us uniquely qualified to provide this much needed service. Call your Condé sales representative at 800-826-6332 for more information.



Condé had the right equipment to print the job for me.... it was easy!
One call, that's all!
Conde took care of it!
Now I know who to call the next time I get in a pinch!



WHOLESALE FULFILLMENT

Do You Know All The Ways Your Business Can Profit From Digital Imprinting?

Condé does!

The sublimation printing process provides innovative and exciting solutions for sign makers who want creative, full-color interior signage along with low production costs.
Condé's unique and affordable system packages are ideal for those entrepreneurs with a finite amount of capital, but want to produce beautiful, customized products that are easy to sell and offer generous profit margins.
Trophy shops can offer full-color, personalized plaques and trophies with vivid graphics, photographs, and team logos on each and every one.
Professional and amateur photographers can profit from owning a transfer system that enables them to produce a wider variety of point-of-sale items.

Condé offers a complete line of digital transfer solutions for the imprinting market. Digital imprinting utilizes computers and printers to create images that are transferred to apparel and specialty items. By adding a digital imprinting solution to their business, screen printers, sign makers, embroiderers, pad printers, engravers, and photographers can provide their customers with high-quality, detailed, full-color, customized items.

What Is Heat Transfer?

The heat transfer concept became popular with the iron-on decals of the 1960's. But over the last couple of decades, the stiff, plastic decals that cracked and faded with washing have evolved into a high-quality transfer that is comfortable to wear and does not fade or crack when washed. Today, anyone who has access to a color printer can create images on t-shirts, sweatshirts, tote bags, ribbons, cloth wall calendars, purses, mousepads, keyboard wrist pads, coasters, dish towels, robes, team jerseys, work shirts, aprons, suspenders, shorts, fabric books, pillows, and more!

The heat transfer process consists of an image printed onto specially coated paper. The three most popular transfer papers available are color laser copier (CLC), thermal printers, and ink jet printers. Keep in mind, you must have the correct paper for your type of printer. This printed "heat transfer" and fabric item are then placed into a heat press at 375º. When complete, the paper is peeled away to reveal the image.

Condé offers customers the option to purchase complete heat transfer systems designed specifically to meet their demands, or to integrate an existing system to increase functionality. Complete transfer systems include printers, scanners, digital cameras, computers, software, and heat presses. While many have made a profession of this short–run solution to screen printing, others use transfer for in-house marketing, corporate functions, personalized awards and recognition items, and customized gifts.

What Is Ink Jet Sublimation?

The ink jet sublimation process uses sublimation ink, installed in a printer equipped with Piezo print heads, to print computer graphics onto high-quality ink jet paper. This "sublimation transfer" and a specially coated item (substrate) are then placed into a heat press. At 350-400º, the solid molecules in the ink turn into a gas and penetrate the pores of the substrate's coating. When the substrate is removed from the heat press, the temperature drops, the pores close and the gas reverts back to a solid state. The result is an incredibly vibrant sub-surface transfer that will not scratch off or wash out.

Condé DyeTrans™ Sublimation Transfer Systems include everything a PC or Mac user needs to transfer full-color, photographic quality images to a variety of substrates including ceramic tile, fiberglass reinforced plastic, glass, wood, fabric, metal, and more. Because the systems are clean, safe, and require very little training or equipment, sublimation transfer also works well for service bureaus, small businesses, and home business entrepreneurs.

Condé offers everything needed to get into the custom imprinting business including transfer systems, production software, blank imprintables, transfer paper & supplies, instructional videos, and educational workshops.

Men's Basic Performance Short Sleeve T-Shirts

The Vapor Basic Performance T-Shirt is a spun poly with the feel of cotton. The double stitched ribbed collar will keep its shape wash after wash. This 5.9 oz. shirt has been styled and designed to allow for maximum movement and comfort. The performance fabric is great for those that work outdoors because it wicks moisture away from the body while other shirts actually trap moisture. Built in anti-microbial and anti-stain features are an added bonus. 100% spun polyester. ✤

The Vapor Advantage

Used for the entire performance line of garments, Intera's patented technology accelerates moisture evaporation, keeping the wearer cooler and more comfortable. The fabric permanently bonds a water-attracting molecule to the surface of the fibers, creating superior moisture transport. Vapor Apparel's garments are resistant to stains of all types and are odor, bacteria, fungal, and mildew resistant.

◀ Glass Floor Tiles

These glass tiles are a dynamic alternative to ordinary floor coverings and are suitable for high-traffic residential and commercial applications such as kitchens, hallways, foyers, business lobbies, executive suites, and boardrooms. The tiles represent a breakthrough in longevity due to placement of the image on the back-side of the tile. This protects the image from fading due to sunlight exposure and from wearing away due to foot traffic. The tiles can also be used for wall murals, countertop installations, and swimming pools. Individual glass tiles feature a textured finish and are ANSI (American National Standards Institute) and ASTM (American Society for Testing and Materials) compliant.

Interlocking Base Grid

For those looking to install glass floor murals with minimal effort, our plastic interlocking grid system is designed to make the process easy and painless. All you have to do is glue the glass tiles into the grid and snap the plastic grid pieces together... the spacing is automatic! Installs over most existing floors without special tools, materials, or floor preparation. The grid system can be used in commercial and domestic applications and is especially good for temporary flooring at trade shows and other special events.

ArTainium Sublimation Inks

ArTainium UV+™ inks utilize a proprietary method of dye particle encapsulation. This procedure makes them the most UV resistant sublimation inks available on the market. Stringent manufacturing and quality control procedures ensure stability and consistency. In addition, professionally created ICC color management profiles provide stunningly accurate and consistent color control management.

Ink Delivery System Options

Standard Cartridges — Standard cartridges are adequate for occassional use, but are not an efficient or economical way of producing large quantities of personalized products.

Refillable Cartridges — Refillable cartridges install and function like traditional cartridges but can be easily refilled through an opening on the top using economical bottled inks.

Easy Flow System — Easy Flow Systems provide the most efficient, cost effective, cleanest, effortless continuous ink flow delivery system. Never buy a one-time-use cartridge again!

SUBLIMATION INK

HEAT PRESSES & ACCESSORIES

Digital Mug Press

This full wrap-around, handle to handle, top-to-bottom mug press can press images up to 5" high, and as close as ½" from the handle, depending on the mug size. The DK3 is fully adjustable, accommodating 11 oz, 15 oz, 16 oz. mugs and steins. The thick solid steel framework and die-cast clamp assembly provides a heavy duty framework for non-stop use. The clamp assembly can be adjusted for very heavy pressure, allowing for full bleed transfers on even the most demanding mugs.

DK3110	DK3 Digital Mug Press.

Condé's presses vary in size and function to accommodate a vast range of substrates. Whether it's a mug press, clamshell, swing-away, or large format press, we have a solution to meet your needs!

Pro Spray II

Pro Spray™ is quite simply the fastest and easiest way for custom imprinters to achieve higher quality, sharper images during the transfer stage of the sublimation transfer process. DyeTrans ProSpray tacks the printed image to the substrate without interfering with the dyes that gas from the print - making it easy to align and secure the transfer for consistent, "ghost-free" results.

PROSPRAY-II	DyeTrans Pro Spray, 11 Oz. Can.

Heat Tape

Securing the transfer to the substrate is one of the most important steps in the sublimation process. Prevents "ghosting" caused by paper shift.

54148	1/2"x72 Yd. Roll of Heat Tape.
54199	Tape Dispenser w/3" Core.

Wraps

Wraps are an easy and inexpensive way to produce mugs, steins, water bottles, and dog bowls in any oven. Performs very well on top-to-bottom and handle-to-handle mug transfers.

DYEWRAP-10	9.75"x4.375" For 11 Oz. Mugs, 18 Oz. and 20 Oz. Steins.
DYEWRAP-68	6"x8.875" For Water Bottles.
DYEWRAP-173	17.5"x3.5" For Dog Bowls.

Cool Plate

The Cool Plate, designed to remove heat rapidly, makes the handling of hot products a quicker process and eliminates the need for spreading items out while they cool. The 19"x14"x6" footprint can be utilized as a workspace when it's not in use.

CPB19146	Cool Plate, 110v.

JetPress 14 Swing-Away Presses

The JetPress 14 features a digital timer, adjustable temperature control and temperature readout, and adjustable pressure. These presses apply several hundred pounds of clamping force with little operator effort, at much better pressure and temperature a hand iron can deliver, at a fraction of the time. For light usage & portability, the JetPress line is the perfect answer.!

JP14S	12"x14" Swing-Away Press.

Automatic Shuttle Presses

The dual sliding table configuration allows the operator to unload a finished item while the material on the other table is being pressed. Production capacities are doubled beyond the transfer printing speed provided by the fully automatic operation of the timer, temperature and pressure controls.

394-TS-16	16"x20" Shuttle Press.
394-TS-20	20"x24" Shuttle Press.

Jumbo Swing-Away Presses

Same features as the DK20S but with an oversized 20"x25" heat platen. Heavy duty stand with lockable casters.

DK25S	20"x25" Jumbo Press w/Stand, Manual.

Digital Clamshell Presses

The clamshell opening action pulls up and away from the loading table allowing for full unrestricted access to the platen. The optional automatic release upgrade opens the press automatically at the end of the timing cycle like a semi-automatic, air operated press... without the compressor!

DK16	14"x16" Digital Clamshell Press.
DK20	16"x20" Digital Clamshell Press.
DK16-AUTO	Auto Release Pop-Up Upgrade For DK16.
DK20-AUTO	Auto Release Pop-Up Upgrade For DK20.
DKA-STAND	Heavy Duty Stand w/Casters.

Digital Cap Clamshell Presses

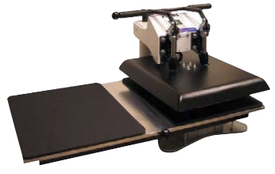
Gas spring hydraulic lifters provide a smooth, hands free opening action of the heater. Teflon-coated curved heat platen can be replaced with other optional curved forms.

DK7	Cap Press.
DK7T	Twin Cap Press.
DKA-47BF	4"x7" Curved Drop On Cap Form.
DKA-EURO	3.5"x6.5" Curved Drop On Cap Form.
DKA-YOUTH	3"x5" Curved Drop On Cap Form.

Geo Knight DK20S Swing-Away Heat Presses

The DK20S is a 16"x20" swing-away heat transfer press that combines a heavy-duty solid steel industrial grade pressing framework with accurate and easy to use electronics. Features an easy to read oversized-digit LCD display to show time and temperature simultaneously, and the temperature readout is accurate within +-2°. Adjustable to accommodate materials from fabric thickness all the way up to 1" thick substrates! All standard presses are 110/120V; 220V available for a conversion charge.

DK20S	16"x20" Press, Manual, 110V.	**DKA-STAND**	Heavy Duty Stand w/Casters.
DK20SP	16"x20" Press, Air Operated, 110V.		



DK Twin Shuttle Attachment

The Digital Knight Twin Shuttle Upgrade is a dual station Add-On for the DK20S swing-away heat press (and DK20 clamshell, with user modification to clamshell frame). Adding a twin shuttle removes wasted operator time waiting for a pressing cycle to finish. It also negates heat platen idle time while waiting for the operator to load and unload. Laying out fabric, shirts and garments is a breeze, with the two 16"x20" silicone pads positioned just like the standard table configuration on the press.

DKA-TWIN	DK Twin Shuttle Attachment.

Digital Combo Multipurpose Swing-Away Heat Presses

This 14"x16" fully digital swing-away press boasts Digital Temperature, Time, and a Digital Pressure/Height Gauge, as well as programmable presets, user definable alarms, and a host of other digital features. The success of this press lies in its interchangeable system of heat platens and tables for transferring images onto a surprisingly wide variety of substrates.

DC16	14"x16" Digital Combo Press.	**DC-PLATE4**	4.5" Plate Attachment.
DC-CAP-EURO	Euro Style Cap Attachment.	**DC-PLATE5**	5.5" Plate Attachment.
DC-CAP-STND	Standard Cap Attachment.	**PUCK**	Puck For 7.5" Plates.
DC-CUBE	Memo Cube Attachment.	**PUCK5.5**	Puck For 10" Plates.
DC-MUG	1/2 Mug Attachment.	**DKA-STAND**	Stand w/Casters.

Heat Insulating Felt Pads

Excellent insulating properties keep the heat next to the item being transferred to! Placing a substrate between the heat platen and the felt pad will contain the heat, therefore reducing pressing time. A must when pressing ceramic tiles.

FLT-14-1Y	1"x40"x1/8".
FLT-141214Y	12"x14"x1/8".
FLT-141416Y	14"x16"x1/8".

NOM-121416	14"x16"x1/2".
NOM-121620	16"x20"x1/2".

Heat Conductive Rubber Pads

Use as a "buffer" between the heat platen of the press and the substrate being pressed. Distributes heat slowly and evenly over substrates. A must when pressing glass products.

HCR-14-1	1"x36"x.25".
HCR-161214	12"x14"x1/16".

Teflon Pillows

Prevent unsightly transfer creases and marks on fabric by using these foam-filled Teflon covered pillows. Placing a pillow under garments with heavy seams or buttons allows even platen pressure during the transfer process. The 5"x18" size is ideal for transferring onto long sleeves.

TP518	5"x18" Teflon Pillow.
TP68	6"x8" Teflon Pillow.
TP1214	12"x14" Teflon Pillow.
TP1620	16"x20" Teflon Pillow.
TP1010	10"x10" Teflon Pillow.

Vapor Foam Kit

Eliminates production lines on garments caused by edges, presses, and paper. Includes 13.5 sq. feet of foam, three practice shirts, and instructions.

FOAMKIT1	Vapor Foam Kit.

Teflon Sheets

Protects the loading table and heat platen of the press from ink and other debris. Just wipe clean... replaces paper towels and protective paper that are normally used and thrown away after each pressing.

Genuine Fractals 5.0

Genuine Fractals is the industry standard for image resizing/enlargement. It's renowned across the photographic and printing industries for its ability to increase image size well over 1000% without the loss of sharpness or detail that you would normally expect. Its patented, fractal based interpolation algorithms work like nothing else and the results speak for themselves. Graphic designers can end the everyday problem of receiving low resolution images from clients for high resolution print work. Requires Photoshop CS2, CS3, or Elements 4 (or later).
